COURSEPACK

FRAMEWORK

GALGOTIAS UNIVERSITY

COURSEPACK (Fall 2023-24)

THE SCHEME

The scheme is an overview of work-integrated learning opportunities and gets students out into the real world. This will give what a course entails.

Course Title	Understanding Harmony and Ethical Human Conduct			**Course Type**				Integrated		
Course Code				**Class**				B.tech CS 4th semester		
Instruction delivery	**Activity**	**Credits**	**Credit Hours**	**Total Number of Classes per Semester**				**Assessment in Weightage**

COURSE OVERVIEW

This course is designed in such a manner to provide knowledge about the concepts of harmony at various levels — individual, family, society, and nature. It aims to cultivate a deeper understanding of ethical human conduct as a foundation for sustainable living and societal well-being.

COURSEPACK

FRAMEWORK

COURSE OBJECTIVE

This Course is having following objectives:

The primary objective of this course is to foster a comprehensive understanding of human values, ethical principles, and harmonious living at the levels of self, family, society, and nature. It emphasizes developing the ability to reflect on one's beliefs, choices, and behaviors, enabling students to live responsibly and contribute positively to their surroundings. Through exploration of ethical principles and human conduct, students will be guided to recognize the importance of holistic development and mutual respect, which form the foundation for sustainable and meaningful living.

PREREQUISITE COURSE

PREREQUISITE COURSE REQUIRED	No	
If, yes please fill in the Details	Course code	Course Title

PROGRAM OUTCOMES (POs):

In general, the Program Outcomes are defined by the respective apex body or council. In the event the POs are not prescribed by a Council, then the concerned school offering the program to design and develop the POs based on the PEOs. This has to be approved by the concerned BOS and submitted to the Academic Council for approval.

After the completion of the course, the student will be able to:

The primary objective of this course is to foster a comprehensive understanding of human values, ethical principles, and harmonious living at the levels of self, family, society, and nature. It emphasizes developing the ability to reflect on one's beliefs, choices, and behaviors, enabling students to live responsibly and contribute positively to their surroundings. Through exploration of ethical principles and human conduct, students will be guided to recognize the importance of holistic development and mutual respect, which form the foundation for sustainable and meaningful living.

PO1:	**Engineering Knowledge:** Apply knowledge of mathematics, natural science, computing, engineering fundamentals and an engineering specialization as specified in WK1 to WK4 respectively to develop to the solution of complex engineering problems.
PO2:	**Problem Analysis:** Identify, formulate, review research literature and analyse complex engineering problems reaching substantiated conclusions with consideration for sustainable development. (WK1 to WK4).

PO3:	**Design/Development of Solutions:** Design creative solutions for complex engineering problems and design/develop systems/components/processes to meet identified needs with consideration for the public health and safety, whole-life cost, net zero carbon, culture, society and environment as required. (WK5).
PO4:	**Conduct Investigations of Complex Problems:** Conduct investigations of complex engineering problems using research-based knowledge including design of experiments, modelling, analysis & interpretation of data to provide valid conclusions. (WK8).
PO5:	**Modern Tool Usage:** Create, select and apply appropriate techniques, resources and modern engineering & IT tools, including prediction and modelling recognizing their limitations to solve complex engineering problems. (WK2 and WK6).
PO6:	**The Engineer and The World:** Analyze and evaluate societal and environmental aspects while solving complex engineering problems for its impact on sustainability with reference to economy, health, safety, legal framework, culture and environment. (WK1, WK5, and WK7).
PO7:	**Ethics:** Apply ethical principles and commit to professional ethics, human values, diversity and inclusion; adhere to national & international laws. (WK9).
PO8:	**Individual and Collaborative Team work:** Function effectively as an individual, and as a member or leader in diverse/multi-disciplinary teams.
PO9:	**Communication:** Communicate effectively and inclusively within the engineering community and society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations considering cultural, language, and learning differences.
PO10:	**Project Management and Finance:** Apply knowledge and understanding of engineering management principles and economic decision-making and apply these to one's own work, as a member and leader in a team, and to manage projects and in multidisciplinary environments..
PO11:	**Life-Long Learning:** Recognize the need for, and have the preparation and ability for: i) independent and life-long learning ii) adaptability to new and emerging technologies and iii) critical thinking in the broadest context of technological change. (WK8).
PSO1:	Have the ability to work with emerging technologies in Computer Science and Engineering requisite to Industry 4.0.
PSO2:	Demonstrate Engineering Practice learned through industry internship and research project to solve live problems in various domains.

PROGRAM SPECIFIC OUTCOMES (PSO's)

PSO1: Have the ability to work with emerging technologies in computing requisite to Industry.
PSO2: Demonstrate Engineering Practice learned through industry internship and research project to solve live problems in various domains.

COURSE OUTCOMES (COs)

After the completion of the course, the student will be able to:

CO No.	Description of the Course Outcome
CO	Develop self-awareness and identify their role in fostering harmonious relationships.

CO2	Understand ethical principles guiding human interactions.
CO3	Gain insights into aligning personal and societal goals..
CO4	Explore practical ways of contributing to a harmonious environment.

TAXONOMY LEVEL OF THE COURSE OUTCOMES

CO No.	Remember **KL1**	Understand **KL 2**	Apply **KL 3**	Analyse **KL 4**	Evaluate **KL 5**	Create **KL 6**
CO 1				✔		
CO 2			✔			
CO 3					✔	
CO4						✔

COURSE ARTICULATION MATRIX

The Course articulation matrix indicates the correlation between Course Outcomes and Program Outcomes and their expected strength of mapping three levels (low, medium, and high).

COs/ Pos	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**	**PO9**	**PO10**	**PO11**	**PO12**	**PSO1**	**PSO2**
CO 1		2					1							
CO 2		1	2						1				2	2
CO 3	3			1	2			1					3	2
CO 4	1			2				1					1	2

Note: 1-Low, 2-Medium, 3-High

COURSE ASSESSMENT

The course assessment patterns are the assessment tools used both in formative and summative examinations. Components are

1. Internal Assessment (IA) with frequency2(Quizzes/Tests, Assignments)
2. Mid Term Exam (MTE) with frequency 1
3. End Term Exam (ETE) with frequency 1

Assessment pattern (in General) for theory course

Type of Course	CIE Weightage			End Term Exam (ETE) Weightage
	IA 1	IA 2	Mid Term Exam	
Theory (T)	25	25	50	50
Final Weightage	25		25	50
Total	100			
Final Weightage	**25**		25	50
Total	100			

COURSE CONTENT

(THEORY)

CONTENT (Syllabus)
Unit-1 Introduction to Value Education 1. Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education) 2. Understanding Value Education 3. Practice Session PS1 Sharing about Oneself 4. Self-exploration as the Process for Value Education 5. Continuous Happiness and Prosperity – the Basic Human Aspirations 6. Practice Session PS2 Exploring Human Consciousness 7. Happiness and Prosperity – Current Scenario Lecture 6: Method to Fulfill the Basic Human Aspirations 8. Practice Session PS3 Exploring Natural Acceptance **Unit-2 Harmony in the Human Being** ● Understanding Human being as the Co-existence of the Self and the Body ● Distinguishing between the Needs of the Self and the Body ● Practice Session PS4 Exploring the difference of Needs of Self and Body ● The Body as an Instrument of the Self ● Understanding Harmony in the Self ● Practice Session PS5 Exploring Sources of Imagination in the Self ● Harmony of the Self with the Body ● Programme to ensure self-regulation and Health ● Practice Session PS6 Exploring Harmony of Self with the Body **Unit-3 Harmony in the Family and Society** • Harmony in the Family – the Basic Unit of Human Interaction

- 'Trust' – the Foundational Value in Relationship
- Practice Session PS7 Exploring the Feeling of Trust
- 'Respect' – as the Right Evaluation
- Practice Session PS8 Exploring the Feeling of Respect
- Other Feelings, Justice in Human-to-Human Relationship
- Understanding Harmony in the Society
- Vision for the Universal Human Order
- Practice Session PS9 Exploring Systems to fulfil Human Goal

Unit-4 Harmony in the Nature/Existence

- Understanding Harmony in the Nature
- Interconnectedness, self-regulation and Mutual Fulfilment among the Four Orders of Nature
- Practice Session PS10 Exploring the Four Orders of Nature
- Realizing Existence as Co-existence at All Levels
- The Holistic Perception of Harmony in Existence
- Practice Session PS11 Exploring Co-existence in Existence

Unit-5 Implications of the Holistic Understanding – a Look at Professional Ethics

- Natural Acceptance of Human Values
- Definitiveness of (Ethical) Human Conduct
- Practice Session PS12 Exploring Ethical Human Conduct
- A Basis for Humanistic Education, Humanistic Constitution and Universal Human Order
- Competence in Professional Ethics
- Practice Session PS13 Exploring Humanistic Models in Education
- Holistic Technologies, Production Systems and Management Models-Typical Case Studies
- Strategies for Transition towards Value-based Life and Profession
- Practice Session PS14 Exploring Steps of Transition towards Universal Human Order

LESSON PLAN FOR COMPREHENSIVE COURSES

FOR THEORY	15 weeks * 1 Hour = 15 Classes) (1 credit = 1 Lecture Hour)

(1 credit = 3 self-Learning hours) (Not to mention in the lesson plan)

L-No	Topic for Delivery	Tutorial/ Practical Plan	Skill	Competency
1	Right Understanding, Relationship and Physical Facility (Holistic Development and the Role of Education) Understanding Value Education Self-exploration as the Process for Value Education	Lecture	Analyze situations in personal or professional life that require ethical decision-making. Suggest ethical solutions to everyday dilemmas.	
2	Continuous Happiness and Prosperity – the Basic Human Aspirations. Exploring Human Consciousness	Lecture		
3	Happiness and Prosperity – Current Scenario Method to Fulfill the Basic Human Aspirations Exploring Natural Acceptance	Lecture		
4	Understanding Human being as the Co-existence of the Self and the Body. Distinguishing between the Needs of the Self and the Body. Practice Session PS4 Exploring the difference of Needs of Self and Body	Lecture	Identify the root causes of stress, emotional imbalance, or unethical behavior. Compare situations where harmony was maintained versus disrupted.	
5	The Body as an Instrument of the Self Understanding Harmony in the Self Practice Session PS5 Exploring Sources of Imagination in the Self	Lecture		

6	Harmony of the Self with the Body. Programme to ensure self-regulation and Health Practice Session PS6 Exploring Harmony of Self with the Body	Lecture		
7	Harmony in the Family – the Basic Unit of Human Interaction 'Trust' – the Foundational Value in Relationship Practice Session PS7 Exploring the Feeling of Trust	Lecture	Design a family bonding activity or social campaign promoting cooperation and respect. Create a community action plan for fostering inclusivity and social harmony.	
8	'Respect' – as the Right Evaluation. Practice Session PS8 Exploring the Feeling of Respect Other Feelings, Justice in Human-to-Human Relationship	Lecture		
9	Understanding Harmony in the Society Vision for the Universal Human Order Exploring Systems to fulfil Human Goal	Lecture		
10	Understanding Harmony in the Nature Interconnectedness, self-regulation and Mutual Fulfilment among the Four Orders of Nature	Lecture	Evaluate conservation initiatives and global sustainability efforts. Justify the need for adopting renewable energy sources.	

11	Exploring the Four Orders of Nature Realizing Existence as Co-existence at All Levels	Lecture		
12	The Holistic Perception of Harmony in Existence Exploring Co-existence in Existence	Lecture		
13	Natural Acceptance of Human Values Definitiveness of (Ethical) Human Conduct Exploring Ethical Human Conduct	Lecture	Design a code of conduct for a hypothetical organization. Create a training module on professional ethics for employees.	
14	A Basis for Humanistic Education, Humanistic Constitution and Universal Human Order Competence in Professional Ethics Exploring Humanistic Models in Education	Lecture		
15	Holistic Technologies, Production Systems and Management Models-Typical Case Studies Strategies for Transition towards Value-based Life and Profession Exploring Steps of Transition towards Universal Human Order	Lecture

STUDENT-CENTEREDLEARNING (SELF-LEARNING TOWARDS LIFE-LONG-LEARNING)

The following strategies encourage active participation, critical thinking, and self-reflection, making learning meaningful and engaging for students.

Activity	Description	Learning Outcome
Reflective Journals	Students maintain a journal to reflect on their personal values, experiences, and ethical dilemmas faced during the course.	Develop self-awareness and a deeper understanding of ethical human conduct.
Case Study Analysis	Real-life scenarios related to ethical challenges are presented for analysis.	Enhance critical thinking and decision-making skills in ethical situations.

	Students discuss solutions and ethical decision-making processes.	
Group Discussions and Debates	Students participate in discussions on topics such as environmental ethics, social harmony, and global cooperation.	Improve communication skills, empathy, and appreciation for diverse perspectives.
Role-Playing Exercises	Students act out ethical dilemmas in social, professional, or environmental settings.	Practice ethical decision-making and conflict resolution skills.
Peer Teaching	Students research and present ethical issues or topics related to harmony in various contexts.	Foster collaboration and strengthen understanding of key concepts.
Project-Based Learning	Students work on projects focused on promoting harmony, ethical practices, or environmental sustainability in their community.	Apply learning in real-world contexts and develop problem-solving skills.
Storytelling and Case Sharing	Students share personal stories or inspirational examples related to ethical conduct and harmonious relationships.	Strengthen emotional connections to ethical principles and values.
Service Learning	Students engage in community service projects, reflecting on their experiences and the values of cooperation and empathy.	Develop social responsibility and community engagement.
Mindfulness and Meditation Activities	Guided activities to promote self-awareness, empathy, and inner harmony.	Foster emotional regulation and holistic well-being.
Ethics Quizzes and Games	Interactive quizzes and ethical dilemma games to test and reinforce ethical principles.	Make learning engaging and assess knowledge retention.

These activities empower students to take responsibility for their learning and internalize the principles of ethical human conduct and harmony.
